Gaming Entertainment Systems (GES) installs its Jackpot Poker System on 40 Tables at Melbourne's Crown Casino

Gaming Entertainment Systems (GES) announced the installation of its innovative table progressive and bonus system at Crown Melbourne (Crown). The GES Progressive system is installed on 40 Poker Tables in Crown's Poker Room and offers the chance to win a Jackpot prize for all cash game players playing Texas Hold'em Poker.

The GES Progressive system utilises technologies offering a cutting edge and flexible solution. Each poker table is easily connected to the central management console which is ideal for poker room environments where table numbers and locations change regularly.

Simon Witty - Director of Tables for Paltronics Australasia, GES' exclusive Australian distributor commented: - "We have been working closely with Crown for 18 months on this project which represents the first major system installation for GES. The GES progressive system is very innovative enabling quick installation, ease of use for operators and a fully featured central management console."

Crown Melbourne's General Manager Table Games Strategy & Commercial Tim Barnett, commented: - "Crown are always looking for innovative ways to improve products and provide experiences that customers value and the GES Progressive system allows Crown to introduce a flexible jackpot product to the Poker Room and provide a further reason to play poker at Crown Melbourne. We have been highly impressed with GES and Paltronics in their flawless delivery of this project."
